

PHILIP E. McINTYRE

**RESEARCH ENGINEER
FOR N.H. HIGHWAYS**

Philip E. McIntyre, Randolph native, has been named materials and research division engineer for New Hampshire's Department of Public Works and Highways. Son of Mr. and Mrs. Edwin McIntyre, he was graduated from Norwich University in 1953 and received his master of science degree in civil engineering from the University of Virginia while employed by the Virginia Highway Department as a research assistant. He joined the New Hampshire highway department in 1957 and from 1964 to 1968 was employed by the Asphalt Institute as district engineer. He returned to New Hampshire in 1968.

In his new post, McIntyre will administer all activities connected with research, laboratory testing and on the field inspection of all materials used in constructing new bridges and highways in the state.
