

Shellcamp/Meadow Pond
Floating island

In 2018, after a strong windstorm, a mass of vegetation or floating island, including a small wire fence and folding chair, broke lose and floated across to the east side of Meadow Pond. It first landed in the curve of the road to the north, but soon came to rest adjacent to the north side of the fishing ledges, where it remains today. 11/02/2019

Floating Island

First Landing Position

Final landing place (for now?)

Furniture and all!
