NH Route 140/107 Intersection

The Town has some exciting news to share!

Last summer the Town contacted NH DOT to express concerns with the current design of the NH Route 140/107 intersection. A meeting with representatives of Town Government and NH DOT was then held in the fall of 2019 during which NH DOT committed to work on a new design that would aim at enhancing safety features at the intersection.

NH DOT representatives met again today with Town representatives at the Academy Building to deliver on their commitment. A new design with a four-way stop-sign setup was presented (See attachment). The new design involves limited work and reconfiguration, is within State Right-Of-Way and therefore actionable immediately.

As you know the intersection re-design had been identified as a Top-3 priority project in the Lakes Region and has been listed on the NHDOT 10-year plan with an expected implementation targeted for 2029.

Construction for the new design presented today is planned to start as early as July 20, 2020, just four weeks from now. It will "buy" the Town at least 9 years in helping to reinforce the safety of residents, commuters and visitors who drive through the intersection regularly and, potentially save numerous lives.
